**New organization formed in 2013; FY 2013 Form 990 not yet filed.**

**Toby Mack, President & CEO**  
**Energy Equipment and Infrastructure Alliance (EEIA)**

EEIA is the trade association representing the North American energy supply chain – suppliers of equipment, construction, materials, supplies and services to oil and gas upstream, midstream and downstream infrastructure and operations.

EEIA's membership includes the major trade organizations and companies in the energy supply chain. EEIA enhances public support for fossil energy, and advocates at the federal and state levels for policies that encourage full development of our vast oil, gas and liquids resources, especially those newly accessible through advances in discovery and extraction technologies including horizontal drilling and hydraulic fracturing. EEIA also provides information on the energy supply chain marketplace and on its economic and employment contributions to the economy.

Prior to joining EEIA in 2013, since 1990 Mr. Mack served as President and CEO of Associated Equipment Distributors, the international trade association representing companies supplying heavy equipment and related products and services to the construction, energy, mining and forestry industries in North America.

Previously he served as CEO of the National Electronic Distributors Association, as Vice President of the Electronic Industries Association, and as a U. S. Navy officer. He graduated from Penn State University.

He is active in the leadership of business, professional, civic and philanthropic organizations, including current roles as Director of the U.S. Chamber Foundation's Advisory Board on Emerging Issues, Member of the Chamber's Association Committee of 100, Vice President and Director of the United States Navy Memorial Foundation, Director of the Canadian-American Business Council; and previously as Vice Chairman and Director of the American Society of Association Executives, and Director of the National Association of Wholesaler-Distributors.
