

**Amendment to the Amendment in the Nature of a Substitute to H.R. 263
Offered by Mr. Graves of Louisiana**

At the end of the bill, insert the following -

“No provision of this act shall take effect if determined by the Secretary of Energy to result in an increased risk of climate change impacts as a result of higher global emissions associated with non-American supply of energy resources to meet global demand. In making such determination the Secretary shall conduct an analysis of

- a) projected global demand for oil and natural gas through 2050
- b) full lifecycle greenhouse gas emissions of the projected supply of domestic energy consumption through 2050
- c) if the average life cycle greenhouse gas emissions of any of the projected global supply of energy resources is higher or lower than the lifecycle greenhouse gas emissions that could have occurred from domestic energy resources”
