

Committee on Natural Resources

Rob Bishop Chairman
Mark-Up Memorandum

February 9, 2018

To: All Natural Resources Committee Members

From: Majority Committee Staff – Will Layden
Subcommittee on Federal Lands (x6-7736)

Mark-Up: **H.R. 835 (Rep. Doug Lamborn)**, To update the map of, and modify the maximum acreage available for inclusion in, the Florissant Fossil Beds National Monument.
February 14, 2018, at 10:15 AM; 1324 Longworth House Office Building

Summary of the Bill

H.R. 835, introduced by Representative Doug Lamborn (R-CO-05), revises the title, number, and date of the map depicting the Florissant Fossil Beds National Monument in Colorado and increases from 6,000 to 6,300 the maximum number of acres that may be made available for inclusion in the Monument.

Cosponsors

Rep. Jared Polis [D-CO-02] and Rep. Scott R. Tipton [R-CO-03]

Background

The Florissant Fossil Beds National Monument was designated in Teller County, Colorado in 1969 to preserve one of the richest fossil deposits in the world and interpret its geological significance and its paleontological resources.¹ The Monument features detailed fossils of insects, plants and giant petrified redwood stumps, teaching visitors about prehistoric Colorado. The Monument offers a variety of recreational activities including hiking, sightseeing, ranger-led experiences and stargazing.²

The Monument has a collection of more than 12,000 fossil specimens and is part of ongoing collaborations with universities.³ These resources have allowed scientists to study the ecosystem of the area from 34-35 million years ago.

The Monument encompasses 5,998 acres just west of Pikes Peak, 35 miles west of Colorado Springs, Colorado.⁴

³ Statement of Dr. Stephanie Toothman, Associate Director, Cultural Resources, Partnerships and Science, National Parks Service. June 15, 2016.

In May 2016, the National Park Service (NPS) received a proposed donation of 280 acres of private land adjacent to the current northwestern boundary.⁵ The donation would give access to the Monument for wildland fire protection and additional wildlife habitat.

The Monument size is capped at 6,000 acres by Public Law 91-60 and requires legislative action to expand the boundaries.

H.R. 835 would allow for modification of the maximum area of the monument to 6,300 acres and allow NPS to accept the 280 acres currently being held by the Palmer Land Trust and Coalition for the Upper South Platte until the Monument boundaries can legally be admitted into the Monument.⁶

This legislation would allow for updates to the official map of the Florissant Fossil Beds National Monument. According to NPS, the only additional expenses associated with accepting the donation would be the minor labor cost to move boundary fences and update maps. No additional funding or staff is needed.⁷

The House Committee on Natural Resources Subcommittee on Federal Lands held a legislative hearing on H.R. 835 on February 6, 2018.

Cost

A Congressional Budget Office cost estimate has not yet been completed for this bill.

Administration Position

The Administration's position is currently unknown.
