

## **Gene Shawcroft, General Manager, Central Utah Water Conservancy District**

Gene grew up on a farm in Southern Colorado and enjoyed working and playing in the water. After graduating from Brigham Young University with a B.S. and M.S. in Civil Engineering, Gene joined the State of Utah working for the Division of Water Resources. He joined Central Utah Water Conservancy District in 1991 and worked as a Project Engineer, Assistant General Manager, Deputy General Manager and was appointed as the General Manager in January of 2015. The District operates and maintains the massive Federal Central Utah Project, a large local Central Water Project and various water treatment plants and related facilities.

Gene is a licensed Professional Engineer in Utah and is active in various professional groups and serves on several governing boards in the water industry. He is a frequent lecturer on water related topics to professional, academic and civic groups. Gene enjoys his work, outdoor activities and his family. Gene is married to Janeen and between them they have 9 children and 23 grandchildren.
